

WHAT IS CLAIMED IS:

1. A cleaning sheet which comprises a thermoset resin layer having porosity as a cleaning layer.

2. A cleaning sheet which comprises a support and
5 a thermoset resin layer having porosity formed as a cleaning layer on one side of the support.

3. A cleaning sheet which comprises a sheet material comprising a thermoset resin layer having porosity and, formed on one side of the sheet material, a pressure-sensitive adhesive layer comprising a thermoplastic resin.
10

4. A cleaning sheet which comprises a support, a thermoset resin layer having porosity formed as a cleaning layer on one side of the support, and a pressure-sensitive adhesive layer comprising a thermoplastic resin formed on
15 the other side of the support.

5. The cleaning sheet of any one of claims 1 to 4, wherein the thermoset resin layer having porosity has substantially no tackiness.

6. A transfer member having a cleaning function,
20 which comprises a transfer member and the cleaning sheet of claim 3 or 4 bonded thereto through the pressure-sensitive adhesive layer comprising a thermoplastic resin.

7. A method of cleaning, which comprises conveying the cleaning sheet of claim 1 or 2 or the transfer member
25 of claim 6.
